MEETING DATE
August 4, 2025

ORIGINATING DEPT
Public Works - Engineering

ATTACHMENTS
Council Bill 2025-133; Agreement; work Authorization; Scoring Summary

REVIEWED BY
Director of Public Works, Daniel Johnson; Finance Director, Leslie Haase; City Attorney, Peter Edwards; Assistant City Manager, Tony Robyn; City Manager, Nicholas Edwards

SUMMARY
This Council Bill authorizes the City to enter into an agreement and work authorization with Horner & Shifrin, Inc. in the not to exceed amount of Fifty-Three Thousand Three Hundred Dollars ($53,300.00) for the review of the Prospect Village Development's Stormwater and Floodplain design.

BACKGROUND
With the Council's approval of the CID and progression of the Prospect Village Development, Public Works needs to review the design and submittals for stormwater and floodplain developments. This will include the review of federal and state permits and submittals for environmental and floodplain concerns. This project will be modifying and working in the floodway of a mapped stream and large detention facilities. This coupled with Rangeline Road and 20th Street being directly downstream and staff being near full capacity with other projects; staff sought a consultant to take on this work with the heavy modeling needed. Staff advertised a Request for Qualifications from consultants to perform this work with two firms responding. Both Statements of Qualifications were scored with Horner & Shifrin, Inc. scoring the best. Public Works received and reviewed the Scope and Fees and found it acceptable for recommending approval.

FUNDING SOURCE
This item will be funded by the Stormwater portion (Economic Development Project) of the Parks & Stormwater Sales Tax.

RECOMMENDATION
Staff recommend approval of Council Bill 2025-133 on first reading.
