Addendum #1

Operational Analysis and Feasibility of a Regional Animal Control Program

Bid No. 2026-RFP-01

Only questions received by deadline are below:

1. What is the established City budget for this Assessment?

   A: The city does not provide financial budgets in this regard and anticipate bidders would respond to the needs and estimate accordingly.

2. Please identify the total number of jurisdictions that will be included in the review of existing facilities, staffing, and budgets that is requested under the Scope of Work section II.A.

   A: This would be determined by the 20+/- mile radius analysis requested, and Missouri only.

3. Under the Scope of Work section III.A. please provide more detail on the expected outcome of the facility requirements? Is the City looking for an estimated square footage for the building, architectural space program, schematic/conceptual design, etc.?

   A: Based on findings, we are looking for possible conceptual relational space layouts and not a schematic design.

4. In Section III.D, does the regional market compensation analysis only include government entities or should it include private sector equivalent positions?

   A: The comparison could include a mix of public and private.
