Please review the requirements of your permit. Monitoring reports that may be required by this permit must be submitted on a periodic basis. Per 40 CFR Part 127 National Pollutant Discharge Elimination System (NPDES) Electronic Reporting Rule, reporting of effluent limits and monitoring shall be submitted by the permittee via an electronic system to ensure timely, complete, accurate, and nationally-consistent set of data about the NPDES program. All general permit covered facilities under this master general permit shall comply with the Department's requirements for reporting via the Electronic Discharge Monitoring Report (eDMR) system. Copies of any reporting forms may be requested, from the Southwest Regional Office, for use at your convenience in utilizing the eDMR system

As a permitted MS4 you are required to submit your Stormwater Management Program (SWMP) report on an annual basis as outlined in *Part 5.3 MS4 Stormwater Management Program Report* of your permit. The outfall(s) identified in this permit are listed as representative outfall(s) and are only a subset of the MS4s outfalls. The permittee is responsible for mapping the location of all outfalls for incorporation into the SWMP as outlined in *Part 4. Minimum Control Measures* of your permit.

This permit may include requirements with which you may not be familiar. If you would like the department to meet with you to discuss how to satisfy the permit requirements, an appointment can be set up by contacting the department's Southwest Regional Office at 417-891-4300. These visits are called Compliance Assistance Visits (CAV) and focus on explaining the requirements to the permit holder.

This General Permit is both your federal discharge permit and your new state operating permit and replaces all previous state operating permits and letters of approval for the discharges described within. In all future correspondence regarding this permit, please refer to your general permit number as shown on page one of your permit.
