RFP-2024-25 Addendum 1 11/18/24

1- Is the City looking for this system to integrate with their current Fleet Management System?
   a. We currently have Central Square Enterprise Asset Management System. Integration would be ideal, but not required.

2- If so, what is the City's current Fleet Management System?
   a. We currently have Central Square Enterprise Asset Management System. Integration would be ideal, but not required.

3- Other than the 8 page PDF found on your website, are there any other documents that discuss project scope in more detail?
   a. The RFP doc is the only info. We gather submitted RFP questions and will post as an addendum in the bid center for all, so sign up for auto notifications of updates.

4- How many vehicles require dashcams versus GPS tracking only?
   a. We are looking for the capability and costing of added dashcam video right now and have not determined how many.

5- It is mentioned that the City would roll out additional units as budget allows. What is the phase 1 versus total potential roll out vehicle count?
   a. Initially approx. 30. We have not determined full annual roll out over ensuing budget years.

6- What is the initial and potential total contract length for this project?
   a. Three years initially with the potential to renew.

7- Is there a vehicle list, or at least a count of OBDII versus JBUS vehicles?
   a. Currently 57 OBD11 set up vehicles and 22 JBUS

8- Is the City open to self-installation or does installation have be quoted ?
   a. We are interested in self-installation but want to understand pricing if we don't.

9- Is the City willing to accept a digital submittal response (PDF via email)?
   a. Our policy requires a written submittal
