Request for Proposal No. RFQ-2015-01
Joplin Library Complex
Addendum #5

A clarification is being made in the RFQ documents on the following questions submitted:

Question: *Is it the expectation of the Library that the team include a separate Library Programmer other than the expertise held by the architectural design team?*

Answer: Your firm must demonstrate it has the expertise to meet the criteria, in house, or otherwise. The intention is to ensure the selected team can provide the services required.

Question: *Are the Satellite Mini-Library to be vending type facilities?*

Answer: Yes. There are various examples we are aware of and this can be vetted further in the visioning process.

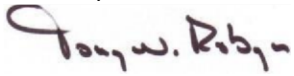

Question: *Will the architecture team or the Landscape Architect and Civil Engineer be responsible for the design of the pocket park and amphitheater?*

Answer: The civil engineer will be responsible for elements outside the building envelope. Our intention is the civil and design team will collaborate closely on site needs.

Question: *Are there any plans available for release of the adjacent future mixed-use development?*

Answer: The master developer is working on the adjacent commercial and has not released design conceptuals yet, but they will be made available when completed. The selected library design firm will collaborate with the master developer on overall connectivity of the two programs.

Sincerely,

Tony Robyn
Disaster Recovery Coordinator
