Addendum 1 3/18/26

Questions

Question 1:
What are, if any, the restrictions on accessing the areas along the creek with mechanical equipment? (i.e Compact Track Loader, Compact Material Handler, Haul Trucks or Trailers) The City will get a nationwide permit which is a permit that cities, counties, and other agencies are required to do on a regular basis.

Question 2:
Will the city provide, or assist in providing, any debris/trash "dumping" or collections locations for collected debris/trash removed from the project site? The contractor should include their own dumpster rental in the bid so that you control the size, location, placement, moving etc.

Question 3:
In regards to the Brush Management: Will the city have any restriction or preferences of the finished results of proposed brush removal (i.e Vegetation materials Shredded, Chipped, or "cut and hauled"? Using equipment like a flail or grinder/chipper for brush material and leaving on site is envisioned.

Question 4:
What are the expectations from the city on start dates and turnaround times? Timeframe is negotiable but we envision summer/fall 2026.
